

Patrick Alunya One Page Portfolio Website Explained

This my one page personal portfolio website for Frontend Website Development Services. Coded using the stacks, HTML, JS, and CSS.

Header Section

- The HTML document starts with the `<!DOCTYPE html>` declaration, followed by the `<html>` element with a `lang` attribute set to "en" for English.
- The `<head>` section contains metadata about the document, including:
 - `<meta>` tags for character encoding and viewport settings.
 - `<title>` element sets the title of the page, which appears in the browser's title bar and in search engine results.
 - Two `<link>` elements that link to external CSS files: `globals.css` and `styles.css`.

Body Section

- The `<body>` section contains the content of the HTML document.
- The first element is a `<header>` section that contains:
 - A `<div>` element with a class of "brand-name" that contains a link to the homepage with the text "Patrick Alunya".
 - A `<div>` element with a class of "nav-links" that contains three links to different sections of the page: "Home", "Projects", and "About".
- The next section is a `<section>` element with a class of "hero" that contains:
 - A `<div>` element with a class of "left-content" that contains:
 - A heading element (`<h2>`) with a span element that highlights the text "Frontend Website Developer".
 - A paragraph of text that describes Patrick Alunya's skills and abilities.
 - A `<div>` element with a class of "buttons" that contains two links: one to a phone number and one to a GitHub profile.
 - A `<div>` element with a class of "right-content" that contains an image element (``) with a profile picture.
- The next sections are:
 - A `<section>` element with an ID of "contact" that contains contact information, including email, phone number, and social media links.

- A `<section>` element with an ID of "projects" that contains a heading, a paragraph of text, and two links to GitHub projects.
- A `<section>` element with an ID of "skills" that contains a heading, a list of technical skills, and a list of non-technical skills.
- A `<section>` element with an ID of "experiences" that contains a heading, a paragraph of text, and a list of work experiences.
- A `<section>` element with an ID of "education" that contains a heading, a list of educational background, including degrees and certifications.

- The final elements are:

- A `<div>` element with a class of "underline" that adds a horizontal line to the page.
- A `<footer>` element that contains:

- A `<div>` element with a class of "brand-link" that contains a link to the homepage.
- A `<div>` element with a class of "footer-content" that contains a paragraph of text with copyright information and a link to the homepage.

- A `<script>` element that links to an external JavaScript file (`current-year.js`) that updates the copyright year dynamically.
