

This website serves as my personal portfolio highlighting my skills, projects, professional experience, and educational background. Designed with a modern and clean aesthetic, the site features sections dedicated to different aspects of my expertise in web development and design. Visitors can explore my technical and non-technical skills, view detailed descriptions and images of past projects, and learn about my professional journey through concise job titles, company names, and roles. Additionally, the site includes my educational background and provides a contact form for potential collaborations and inquiries.

**Functionality:** Basic JavaScript is incorporated for form validation, ensuring that all required fields are filled out before submission.

**Responsive Design:** The website is designed to be responsive, adapting seamlessly to different screen sizes and devices for optimal user experience.

**Purpose:** The purpose of this website is to showcase my professional profile, highlight my skills and achievements, and provide a platform for networking and potential career opportunities in tech world.
